

SAMPLE FILE - Japan Imports of Tubes and pipes of refined copper

The purpose of this paper is to show what sort of typical analytical tables and charts are available in a standard TradeData Excel file for any product imported into Japan. The product chosen was Tubes and pipes of refined copper. Similar information is available for any product. The information is supplied in Excel file format and the file is designed to enable efficient analysis of the underlying statistics. At the end of this paper there are listed two typical import transactions to demonstrate the underlying import information that is available in TradeData's standard Excel file.

Table – Top Ten Origin Countries

The following table comes directly out of our standard excel file and shows – monthly – the top ten supply countries in terms of volumes, as well as average prices per month, by country. This table provides a convenient summary of month to month movements in imports. TradeData will normally supply the current year and five years of back data in its data files. However, if more data is required, in most cases, we can supply at no extra charge.

Price and Quantity

The next chart shows monthly movement in imports volumes - the blue shaded area of the chart - and in average prices on a CIF basis. Import volumes are seasonal with higher volumes in the middle of each year followed by lower volumes. Average prices increased sharply in the second half of 2021, and these have been maintained thus far in 2022.

The excel file enables the user to select a supply country and then redraw this Price&Quantity chart to only include imports from the selected country. The chart below lists Price and Quantity where imports only from China are selected. Import volumes from China also show a similar seasonal pattern. Average prices from China increased strongly in 2021 and these higher prices have been maintained in 2022.

Average Prices – Top Six Supply Countries over time

The following chart list average prices over time for the Top 6 supply countries to Japan. Imports from Malaysia and Finland are at far higher prices than the other major supply countries.

Major Supply Countries

The following two charts list annually the top ten supply countries to Japan both in volume and value terms. These charts draw the major supply countries market shares over time. Imports sourced from China and to a lesser extent Thailand dominate. Imports from Vietnam are increasing from a low base and imports from South Korea re declining.

Market Segments

The following chart lists a Price Histogram by Country. This shows that during the first seven months of 2022 the volumes imported at different price points, and which major supply country supplied at these price points. The Excel file enables the user to select different years and to the chart will redraw itself accordingly. China is the largest supply country and mostly supplies at between \$US15,000 and \$US 17,000 per tonne. Thailand is also a major supply country and supplies at prices around \$US 15,000 per tonne.
