

SAMPLE FILE - Indonesia Exports of Cocoa butter, fat and oil

The purpose of this paper is to show what sort of typical analytical tables and charts are available in a standard TradeData Excel file for any product exported from Indonesia. The product chosen was “Cocoa butter, fat and oil”. Similar information is available for any product. The information is supplied in Excel file format and the file is designed to enable efficient analysis of the underlying statistics. At the end of the paper there are list two typical export transactions to demonstrate the underlying export information that is available in TradeData’s standard Excel file.

Table – Top Ten Destination Countries

The following table comes directly out of our standard excel file and shows monthly the top ten destination countries in terms of volumes as well as average prices, per month, by country. This table provides a convenient summary of month-to-month movements in exports. TradeData will normally supply the current year and five years of back data in its data files. However, if more data is required, in most cases, we can supply at no extra charge.

Details

There is a worksheet in the excel file that lists Indonesian details by country and average prices each month. Note these are prices at an FOB basis and as such do not include transport and insurance costs. A small sample is below.

Date	Partner_Country_strd	Port	Mode_of_Transport	Sum Quantity	Sum ValueUSD	Unit Price FOB USD per KG
Dec-22	USA	TANJUNG PRIOK	Sea	1,060,000	3,496,872	\$3.30
		TANJUNG PERAK	Sea	760,000	3,184,600	\$4.19
		BATU AMPAR	Sea	2,560,000	9,473,501	\$3.70
		MAKASSAR	Sea	40,000	183,240	\$4.58

Price and Quantity

The next chart shows monthly movement in exports volumes - the blue shaded area of the chart - and in average prices on an FOB basis. Export volumes were fairly stable between early 2019 to early 2022. Since late 2020 average prices have been falling and over the last 6 months of 2022 this has been associated with slightly higher export volumes.

The excel file enables the user to select a particular destination country and then redraw this Price&Quantity chart to only include exports to the selected country. The chart below lists Price and Quantity where exports only to the USA are selected. Export volumes increased strongly throughout 2017 associated with lower prices. The reverse occurred in the second half of 2018 and early into 2019, where export volumes decreased sharply. Exports volumes increased again in the second half of 2019 before declining sharply throughout most of 2020. This pattern of higher followed by lower volumes is repeated in 2021 and 2022. Average export prices have declined substantially over the last two years.

Average Prices – Top Six Destination Countries over Time

The following chart list average prices over time for the Top 6 destination countries for Indonesia. Prices mostly move in a narrow band to the different destination countries and have been fairly stable in 2019 and declining thereafter. Average export prices to Germany and the Netherlands have been at particularly low prices in 2022.

Major Destination Countries

The following two charts list annually the top ten destination countries for Indonesia both in volume and value terms. These charts draw the major destination countries market shares over time.

Exports Volumes by Ports of Loading in Indonesia

The following charts lists the Ports of Loading in Indonesia where exports depart. Tanjung Priok, Batu Ampar and Tanjung Perak are the major load ports.

Market Segments

The following chart lists a Price Histogram by Country. This shows during 2022 the volumes exported at different price points and which major destination country purchased at these price points. The Excel file enables the user to select different years and to the chart will redraw itself accordingly.
